Educational excellence

About LOBO Motorsports
The UNM Formula SAE team is one of the few racecar development teams in the country that is academically supported by its university. The UNM team has been ranked as high as No. 5 in the nation and No. 18 in the world.

Most universities operate FSAE as a club, but UNM offers a three-semester course to learn the engineering, management, and business principles involved in racecar development. Those who join the program are receiving an invaluable educational experience that allows students to develop the skills needed for real-world success.

To find out more, contact the LOBO motorsports team for a presentation and a personalized tour of the facilities.

Sponsorship information
To donate to FSAE, contact Leslie Currie at leslie.currie@unmfund.org or donate online at:

WHAT YOU NEED TO KNOW ABOUT THE FORMULA SOCIETY OF AUTOMOTIVE ENGINEERS PROGRAM AT THE UNIVERSITY OF NEW MEXICO

NEW MEXICO UNIVERSITY OF

SCHOOL OF ENGINEERING
The Formula SAE program at UNM is one of the most hands-on programs in engineering. Over the course of three semesters, students oversee the design and fabrication of two Formula 1-style racecars, developing the skills and experience desired by the engineering industry’s top employers.

1. Students begin the process by designing the vehicle from the ground up.

2. After the car is designed, it moves on to the manufacturing and fabrication phase.

3. Finally, the assembled racecar is tested as drivers train for the competition.
