UNM Researchers,

CCE STEM funds research projects that identify factors that are efficacious in the formation of ethical STEM researchers in all the fields of science and engineering that NSF supports. CCE STEM solicits proposals for research that explore the following: ‘What constitutes ethical STEM research and practice? Which cultural and institutional contexts promote ethical STEM research and practice and why?’ Factors one might consider include: honor codes, professional ethics codes and licensing requirements, an ethic of service and/or service learning, life-long learning requirements, curricula or memberships in organizations (e.g. Engineers without Borders) that stress social responsibility and humanitarian goals, institutions that serve under-represented groups, institutions where academic and research integrity are cultivated at multiple levels, institutions that cultivate ethics across the curriculum, or programs that promote group work. Do certain labs have a ‘culture of academic integrity’? What practices contribute to the establishment and maintenance of ethical cultures and how can these practices be transferred, extended, and integrated into other research and learning settings?

**This is a limited competition. Each institution is limited to one proposal.** If you are interested in submitting a proposal, please email a statement of interest with a tentative title and a brief project description (200 words) by **noon, Tuesday, November 14, 2017** to limited@unm.edu with the subject line indicating: NSF CCE STEM - your name. Based on the e-mail responses received, the Limited Competitions Management Team may announce a call for preproposals.

Please distribute this notice to departments and individuals whom you believe would be interested.

*If you are affiliated with HSC, please contact Corey Ford (CFord@salud.unm.edu) or Cassandra Misenar (CMisenar@salud.unm.edu) for more information.*
